Profile

I am an iOS mobile developer with extensive experience in the financial sector and online stores. I am constantly learning and open to new work challenges. I adapt quickly to any work dynamic. I stand out in my interpersonal skills and problem-solving.

Professional Experience

2022/06 – present

iOS Developer
CODERIO
- Development of user interfaces for the Onboarding module (customer registration with credit card) following the Human Interface Guidelines. The design pattern used is MVVM with use cases, and for view coordination, the coordinator pattern is employed. UIKit is used for view design, both with XIB and programmatically.
- Integration and migration of REST API services.
- Maintenance and improvement of inherited modules within the application.
- Handling production deployments with App Connect.
- Version control management using Gitflow.
- Development of general application improvements.
- Integration of SDKs (Firebase Analytics and Crashlytics, Onboarding Digital Identity) using Swift Package Manager.
- Creation of functional documentation.
- Coordination and collaboration in meetings to add improvements to both the frontend and backend of the application.
- Support in the onboarding process of new mobile developers at the bank.
- Code reviews.

2022/06 – present

iOS Developer
Upwork - Freelancer
- Migration of Objective-c projects to Swift
- Publishing applications on the app store
- Bug fixes and uploading updates to the app store
- Interoperability solutions between Objective-c and Swift
- Integration of new queries in SQLite
- Project management with Jira and task definition for iOS and Android platform
- SDK integration
- Adding features in Objective-c
- Migration of SOAP services to REST

2021/09 – 2022/06

iOS Developer
Naranja X - Bank
- Development of interfaces following Apple's Human Interface Guidelines, utilizing the VIPER design pattern, and creating user interfaces programmatically with UIKit.
- Creation of unit tests and integration tests across the entire VIPER layer using XCTest, as well as UI tests with snapshot.
- Integration of SDKs using Cocoapods.
- Version control management with Git and distribution with Bitrise.
- Development of improvements for inherited modules where I worked with different patterns such as MVP and MVVM.
- Researching various architectures to present improvements in the project.
- Code review.

| 2021/07 – 2021/09 | **Full Stack Developer Web** |
| | *Ixpandit* |

- Implementation of new frontend functionalities using React and Laravel.
- Implementation of new backend functionalities using Node.js and Laravel.
- Database management with MySQL.
- Creation of unit tests with PHPUnit.
- Code review.
- Version control management with Git and distribution with GitHub Actions.

| 2018/04 – 2021/08 | **Wordpress Developer** |

- Creation of e-commerce, e-learning, and landing page websites.
- Customization of tailor-made themes.
- Optimization of website loading speed.
- User interface design.
- Integration with payment platforms for LATAM (MercadoPago and PayPal) using WooCommerce.
- Execution of exploratory testing.
- Implementation of SEO using different tools such as Yoast SEO, Google XML Sitemaps, and W3 Total Cache.
- Creation of user guides for website usage.

Education

| 2022 – 2025 | **Bachelor of Science in Computer Engineering** |
| | *Utel* |

| 2021 | **Bootcamp iOS** |
| | *Bedu* |

| 2021 | **Bootcamp full stack MERN web & mobile** |
| | *MindHub* |

| 2020 | **Curso UX/UI y Curso de desarrollo web** |
| | *CoderHouse* |

| 2017 | **Electronic Technician** |

Skills

Swift
UIKit, Objective-c, SwiftUI, StoryBoard, Xib, Autolayout, XCTest, AppStore, AppConect, SDK Firebase (Analytics, Push Notifications, Realtime Database, Firestore, Dynamic Links), Alamofire, SPM (swift package manager), Cocoapods, Combine, SDK Adjust

React Native
React Native CLI, React Native Expo, Redux, React Navigation 5, Hooks, NPM

Architectures
MVVM, VIP, VIPER, SOLID, MVP, COORDINATORS, CLEAN

Web
HTML, CSS, Javascript, React, Node, Express, Wordpress, Laravel

Databases
MySql, Moongo, CoreData, SQLite

Additional
Git, GitFlow, Figma, JIRA

Languages

English

I can write, read, and understand oral productions without difficulty. I master the technical vocabulary. However, I must continue working on my oral production.

Spanish

Native
